Resolving merge conflicts live demonstration
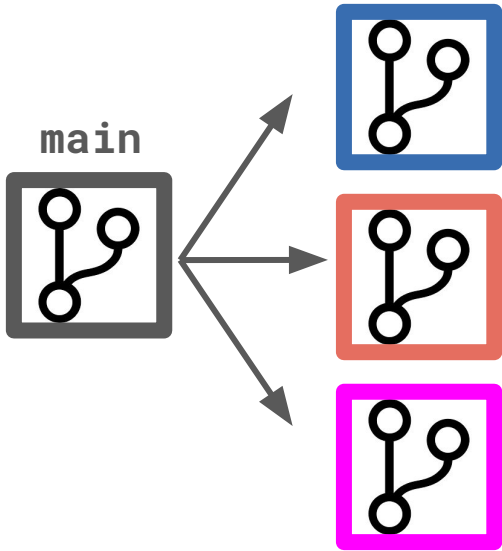

Childhood Cancer Data Lab x Alex's Lemonade Stand

Step 1:
We'll create three branches created off the *same base, at the same time*

main

Step 2:
We'll make some changes in the first branch, and then merge it back into `main`

Step 3:
These two branches will now be *out-of-date* with their base. We'll write code that causes merge conflicts, and then see how to resolve them.
