

Welcome to the June 2024 Virtual Data Lab scRNA-Seq Training Workshop!

June 10 – 14, 2024

Childhood Cancer Data Lab

<https://alexslimonade.github.io/2024-june-training>

Childhood Cancer
Data  Lab

X

Tell us about you!

- What's your name?
 - What are your pronouns?
 - What are you studying?
 - What's a recent piece of media (book, movie, TV show, etc.) you enjoyed?
- 

Meet your instructors

JOSH

Joshua Shapiro

Senior Data Scientist @ the Data Lab

PhD Ecology & Evolution, *UChicago*

Postdoc Integrative Genomics, *Princeton*

Research interests:

- **Evolutionary genomics**
- **Single cell workflows**

jashapiro

Meet your instructors

STEPHANIE

Stephanie Spielman

Data Scientist @ the Data Lab

PhD Integrative Biology *UT Austin*

Postdoc Computational Molecular Evolution *Temple*

Research interests:

- **Protein evolution and reproducible genomics**
- **Data science and bioinformatics education**

sjspielman

Meet your instructors

Ally
Ally Hawkins

Data Scientist @ the Data Lab

PhD Cancer Biology *University of Michigan*
Postdoc Computational Biology *Cornell*

Research interests:

- **Single cell data analysis**
- **Origins of pediatric solid tumors**

allyhawkins

Meet your instructors

JACLYN

Jaclyn Taroni

Director @ the Data Lab

PhD Genetics *Dartmouth*

Postdoc Computational Biology *UPenn*

Research interests:

- **Transcriptomics in rare, complex diseases**
- **Unsupervised pattern extraction**

jaclyn-taroni

Other staff you may see (or have seen already!)

JEN
Jen O'Malley
**Scientific Community
Manager**

- Helps administer Data Lab offerings such as workshops
- Manages communications

DEEPA
Deepa Prasad
**User Experience
Designer**

- Talks to researchers about their needs and frustrations
- Designs usable software

Tell us about you!

- What's your name?
 - What are your pronouns?
 - What are you studying?
 - What's a recent piece of media (book, movie, TV show, etc.) you enjoyed?
- 

Code of Conduct

Be kind, have fun

We value the involvement of everyone in the community. We are committed to creating a friendly and respectful place for learning, teaching, and contributing.

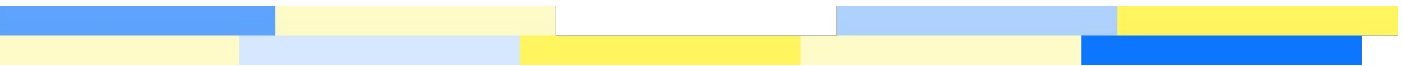

- Use welcoming and inclusive language
- Be respectful of different viewpoints and experiences
- Gracefully accept constructive criticism
- Focus on what is best for the community
- Show courtesy and respect towards other community members

Read the full Code of Conduct here:

<https://alexlemonade.github.io/2024-june-training/code-of-conduct.html>

If you at any time feel harassed or treated inappropriately, please contact ccd1@alexslimonade.org.

What you will learn (and what you won't)

What you will learn

We will introduce you to the R programming language, R Notebooks, and some reproducible research practices.

We cover pipelines for the quality control, pre-processing, and initial analysis of single-cell RNA-seq data almost entirely through hands-on exercises.

We generally elect to go *broad* and not *deep*.

Our overarching goals: To prepare you to perform “frontline” analyses of your own data, to get you more comfortable reading documentation/learning new methods on your own, and to give you tools to collaborate more effectively with analysts when needed

What you won't learn

We don't address experimental design (e.g., how many replicates you need).

We won't compare tools (e.g., Bioconductor vs. Seurat for single cell analysis).

We won't cover every feature (or assumption) of the tools we do present.

You may not be able to perform every analysis you need for your own work, particularly for complex experimental designs. For example, in the context of single-cell analysis, we do not cover integrating data from multiple samples.

We present analysis as a series of *linear steps*. In practice, it's **not**. It's important to consult analysis experts when you need to and to keep track of and report what you've done.

How do we pick what we teach?

We want methods to be or to have:

- Useful for a wide range of experimental designs, sample sizes
- Easy to use, well-documented, and consistently updated
- Solid tutorials, a sizeable user base, and responsive authors/maintainers

We have a preference for methods that integrate easily into a single workflow that can be run on a laptop (and our own personal biases as scientists).

Schedule

Monday

Workshop Intro

Intro to R

RStudio Server
Base R
ggplot2 & tidyverse

Consultations

Exercise notebooks

Wednesday

Single-cell RNA-seq

Dimensionality reduction
Clustering
Marker identification

Consultations

Exercise notebooks
Your own data

Friday

Consultations

Your own data
Exercise notebooks

Presentations

Tuesday

Single-cell RNA-seq

Quantification & QC
Filtering & Normalization

Consultations

Exercise notebooks
Your own data

Thursday

Single-cell RNA-seq

Cell-type annotation
Working with CITE-Seq
data

Consultations

Exercise notebooks
Your own data

Daily Schedule Outline

Instruction

Full group
Lectures

- Introduce concepts and background
- Demonstrate usage
- Answer general questions

Breakout

Small groups
Start exercise notebooks

- Split up into Zoom breakout rooms
- Ask questions of instructors and other participants

Consultation Period

Exercise notebooks
Your own data

- Practice what you have learned
- Work on exercises individually or in groups
- Work with your own data

Module Layout

 00a-rstudio_guide.Rmd
 00b-debugging_resources.Rmd
 00c-good_scientific_coding_practices.Rmd
 01-intro_to_base_R-live.Rmd
 02-intro_to_ggplot2-live.Rmd
 03-intro_to_tidyverse-live.Rmd
 exercise_01-intro_to_base_R.Rmd
 exercise_02-intro_to_R.Rmd
 exercise_03a-intro_to_tidyverse.Rmd
 exercise-03b-intro_to_tidyverse.Rmd

These are **reference** documents.
Go through these on your own.

These are **Instruction** notebooks.
We'll walk through these together,
step-by-step, during the workshop.

These are **Exercise** notebooks.
Use these to practice what you've
learned. We're here to help!

Module cheatsheets cover key functions

<https://github.com/AlexsLemonade/training-modules/tree/2024-june/module-cheatsheets>

dplyr

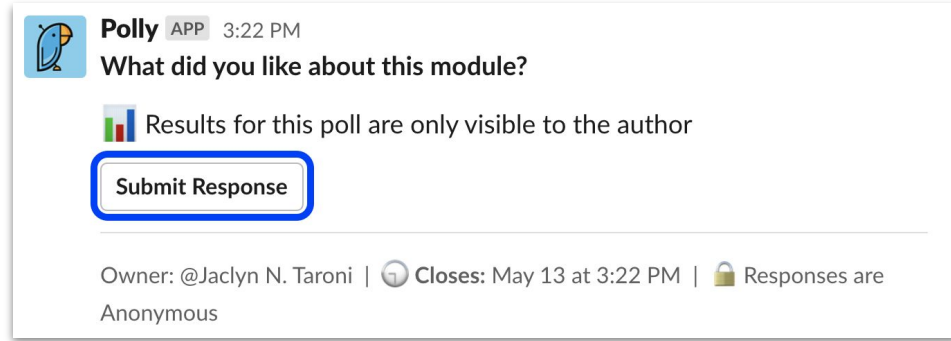

Read the `dplyr` package documentation [here](#).

A vignette on the usage of the `dplyr` package can be found [here](#).

Library/Package	Piece of code	What it's called	What it does
<code>dplyr</code>	<code>%>%</code>	Pipe operator	Funnels a <code>data.frame</code> through tidyverse operations
<code>dplyr</code>	<code>filter()</code>	Filter	Returns a subset of rows matching the conditions of the specified logical argument
<code>dplyr</code>	<code>arrange()</code>	Arrange	Reorders rows in ascending order. <code>arrange(desc())</code> would reorder rows in descending order.
<code>dplyr</code>	<code>select()</code>	Select	Selects columns that match the specified argument
<code>dplyr</code>	<code>mutate()</code>	Mutate	Adds a new column that is a function of existing columns
<code>dplyr</code>	<code>summarise()</code>	Summarise	Summarises multiple values in an object into a single value. This function can be used with other functions to retrieve a single output value for the grouped values. <code>summarize</code> and <code>summarise</code> are synonyms in this package.
<code>dplyr</code>	<code>rename()</code>	Rename	Renames designated columns while keeping all variables of the <code>data.frame</code>
<code>dplyr</code>	<code>group_by()</code>	Group By	Groups data into rows that contain the same specified value(s)
<code>dplyr</code>	<code>inner_join()</code>	Inner Join	Joins data from two <code>data.frames</code> , retaining only the rows that are in both datasets.

We want your feedback!

At the end of each module,
we will post a few questions
in the Slack channel.

The screenshot shows a Slack message from the Polly app. The message text is "What did you like about this module?". Below the text is a poll status indicator showing a bar chart and the text "Results for this poll are only visible to the author". A blue button labeled "Submit Response" is highlighted with a blue border. At the bottom of the message, it says "Owner: @Jaclyn N. Taroni | Closes: May 13 at 3:22 PM | Responses are Anonymous".

- The most difficult or confusing point of the module ("muddiest point")
We will post additional material answering your questions the next day
Responses to this question will appear in the channel anonymously
- What did you like about the module?
- How we can improve the module?
These responses will be collected anonymously (and not posted)

Friday

Your own projects
Exercise notebooks

Spend Friday working with your own data, getting assistance as needed from Data Lab staff and each other.

Presentations

Present what you worked on during the consultation times to the group!

Virtual Training Procedures

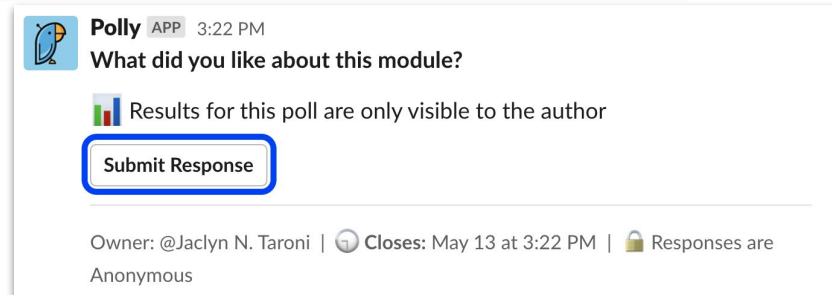

General Zoom Etiquette

- Keep your microphone muted
- Type questions in the Chat window (directed to the host)
 - Click on the “Chat” button at the bottom of your window to open the chat.
- Use the Zoom reactions to tell us how you are doing!

Using Slack

- Use the **#2024-june-training** Slack channel
- Post public questions, get help with errors and debugging, make comments, and help your fellow participants!
 - Use threads to keep related content together
- Watch out for feedback polls!

Communication during instruction

- I have an **urgent question** that needs an answer before moving on:
 - **Raise Hand** or **Chat** with the room host
- I'm **stuck with an error** and can't proceed with the hands-on exercise
 - **Chat** with meeting host: Request 1:1 and you will be placed in a breakout room with a Data Lab staff member

- I have an **general question** that does not need an answer right away.
 - **Post** in #2024-june-training
- I'm **having trouble logging in** to RStudio Server
 - **Direct Message** a Data Lab staff member (not the current host or instructor)

Trouble logging into Zoom and Slack? **Email** training@ccdatalab.org

Communication at other times (consultation periods)

- I have questions about **previous instruction or exercise notebooks**
 - **Post** in #2024-june-training
 - If you need to share your screen, we will set up a 1:1 or group Zoom call
- I would like to be paired up with other participants
 - **Post** in #2024-june-training; we can set you up in a Zoom breakout room
- I have a question that is **highly specific to my data**
 - **Direct Message** a Data Lab staff member
- I'm having trouble **logging in** to RStudio Server
 - **Direct Message** a Data Lab staff member

Trouble logging into Zoom and Slack? **Email** training@ccdatalab.org
